

I object to the unreasonable restriction of the public's right to receive DTV broadcasts other than with "approved/professional" equipment, as will be required if the "broadcast flag" is implemented.

To quote the New Yorkers for Fair Use website (www.nyfairuse.org/), "Free citizens are not mere consumers; they are not a separate group from so-called "professionals." The stakeholders in a truly just information policy in a free society are the public, not those who would reserve special rights to control public uses of information technology."

Thank you.
